

# HOME8

fast connected – always protected

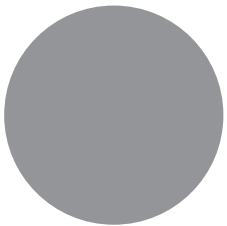

# OVERVIEW

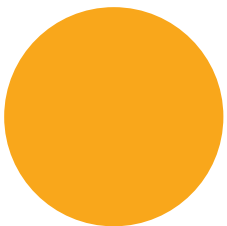

## 1 Feel safe at home

Not to leave your home in the dark: Monitor your rooms using discreet cameras and control them from everywhere with an app, without expensive wall mounting, 24/7 operation.

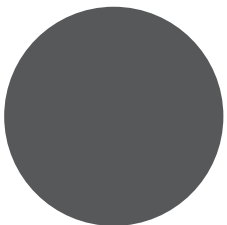

## 2 Senior Care

All-round protection of senior citizens who (wish to) stay at home: Fall sensor and panic button, automatic localisation by related persons, reminder to take medicines and much more.

## 3 Smart Cameras

Monitor your rooms and outdoor area with varied cameras, video recordings in HD quality, motion detection and many other features.

## 4 Smart Home

Messages sent to your smartphone and activation of the siren whenever windows and doors are opened.  
Your electronic devices can be switched on and off from everywhere.

# FEATURES

## Starter Kit

The Starter Kit includes a safety router, two mini HD cameras, one siren and a 16 GB USB stick. Such a start combination can easily be expanded with additional products so that you achieve optimal security.

## Privacy

Multi-patented firewalls and AES 256 encryption will protect all your Home8 security system. The data are not secured in the cloud, but in a self-contained network on the USB-Stick

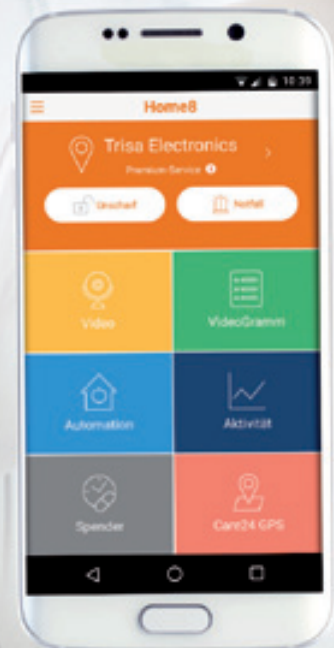

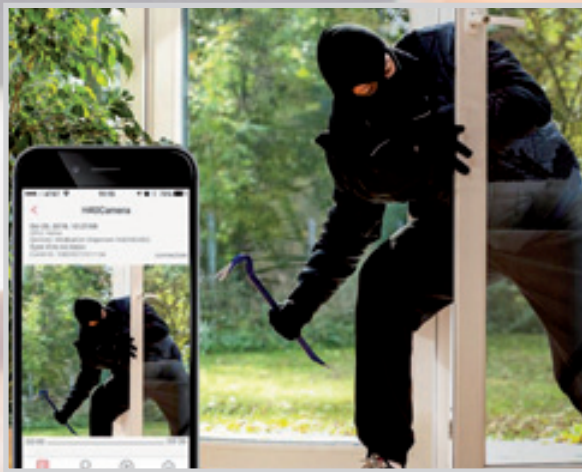

## «Plug & Play»

# FEEL SAFE AT HOME

Not to leave your home in the dark: Monitor your rooms using discreet cameras and control them from everywhere with an app, without expensive wall mounting, 24/7 operation.

## Security router (Set art.1802.70)

- connect to internet router and start selfinstallation
- two mini HD cameras and siren are already pre-installed
- can easy be expanded
- security router forms a closed network (Firewall + AES 256 encryption)
- access only for authorised users
- recordings are saved to the 16 GB USB stick
- cable length: 1.4 meters

Size: 33x160x115 mm

## Mini HD camera

- adjustable motion and sound detection, night vision, 2-way audio (🎤 and 🔊)
- ball mounting allows to move it in all directions
- motion-activated or ongoing camera recording
- video quality: 1280 x 720 pixels
- cable length: 3 meters

Size: 90x50x22 mm

## Siren

- 110 dB Siren
- temporary activation, function not bound to the network
- enable/disable with the app
- cable length: 3 meters

Size: 110x65x28 mm

Set: Fr. 399.00

# SENIOR CARE

It is 9 o'clock in the morning. Marie Louise is going down to the cellar for milk when it happens: She momentarily loses her balance and falls down the stairs. The 81-year-old woman breaks her leg. She cannot get up. She has no telephone with her. She has to stay where she is on the cold cellar floor in severe pain. What seems like an interminable 8 hours later, her daughter finds her. The woman is still lying on the floor and is now suffering from severe hypothermia.

The fall sensor can prevent situations like this. It immediately informs all family members or authorised persons simultaneously. Accidents/falls like the one sustained by Marie Louise are typical of 85% of the over-60s. The inactivity sensor, which is installed at a frequently passed location in the home, also provides assistance. In the event of inability to move, a message is sent to next of kin after a preprogrammed period of time has elapsed.

Why not give yourself and your next of kin peace of mind? The all-round protection for senior citizens: Fall sensor and panic button, reminder to take medication, and much more.

Dosage unit: taking medications

Activity: motion detector

Settings for timer and sound volume

emergency calls

Microphone and loudspeakers

Size: 85x65x60 mm

## Motion detector (art.1803.02) Inactivity detector (art.1805.03)

- covers an area of 120 degrees at a distance of 90 metres
- detects motion
- sends a signal in case of inactivity (fall, accident, etc.)
- programmable from 1 to 24 hours
- inclusive CR123A battery

1803.02: Fr. 99.00  
1805.03: Fr. 89.00

Size: 50x35x15 mm

## Fall detector (art.1805.01)

- sends a signal to your smartphone in case of a fall
- panic button to directly send alarm signals
- sends a notification to authorised users

Fr. 179.00

Size: 40x195x210 mm

## Medication dispenser (art.1805.02)

- reminder to take medicines
- status notification sent to an authorised user
- timer function to protect against overdose
- up to six medication doses per day over a period of four weeks
